

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SAN FRANCISCO BAY REGION

ORDER NO. 78-114

AMENDING THIS BOARD'S ORDER NO. 77-146
TO COMPLETE A TIME SCHEDULE FOR TERMINATION
OF THE DISCHARGES FROM THE WASTE TREATMENT
PLANT OF THE CITY OF PLEASANTON, ALAMEDA COUNTY

The California Regional Water Quality Control Board, San Francisco Bay Region, finds that:

1. The Regional Board on December 16, 1965 adopted Resolution No. 712 prescribing waste discharge requirements for the City of Pleasanton, hereinafter called the discharger, onto a land disposal site, and, on April 30, 1968, adopted Resolution No. 68-23 prescribing amended requirements for mineral quality.
2. The discharger is a member of the Livermore-Amador Valley Water Management Agency (LAVWMA). As part of the LAVWMA project involving construction of a pipeline to transport its member agencies' treated wastes to San Francisco Bay via the East Bay Dischargers interceptor; the discharger and Dublin San Ramon Services District (DSRSD) have undertaken projects (1) to construct an interceptor to carry untreated waste from Pleasanton to DSRSD; and (2) to increase DSRSD's treatment capability. Use of the discharger's treatment plant will be discontinued when these projects are completed. Completion of the Pleasanton and DSRSD projects is necessary to make the total LAVWMA system functional.
3. This Board on November 15, 1977 adopted Order No. 77-146 that amended Resolution No. 712 to include a compliance time schedule for termination of the discharges from the discharger's treatment plant. Construction of the interceptor from Pleasanton to DSRSD commenced in November, 1978, and construction to increase DSRSD's treatment capability is scheduled to begin in March, 1979. It is necessary to complete the compliance time schedule prescribed in Order No. 77-146 to reflect these events.
4. This project constitutes an ongoing project pursuant to Title 14, Section 15070, California Administrative Code, in that this amendment to waste discharge requirements does not include a greater degree of control by the Regional Board over the project as a whole than did the requirements issued prior to April 5, 1973. This project is therefore exempt from the provisions of the California Environmental Quality Act contained in Chapter 3 (commencing with Section 21100) of Division 13 of the Public Resources Code.

It is hereby ordered that Order No. 77-146 be amended to complete the following time schedule:

<u>Task</u>	<u>Completion Date</u>	<u>Report of Compliance Date</u>
Status Report	-	September 15, 1979
Complete Interceptor construction and commence diversion of untreated waste from Pleasanton to DSRSD	May 1, 1980	May 15, 1980
Terminate all waste discharge from the existing Pleasanton treatment plant	October 1, 1980	October 15, 1980

I, Fred H. Dierker, Executive Officer, do hereby certify the foregoing is a full, true, and correct copy of an order adopted by the California Regional Water Quality Control Board, San Francisco Bay Region, on December 19, 1978

FRED H. DIERKER
Executive Officer
